

Fig 4c analogue. WKE Bubble chain, $N \rightarrow \infty$, Bose +1, standard; k_p the peak of $N_k \propto k^2 n_k$; published points and D rescaled by $1/c^2$, $c = 3.09 \pm 0.03$ from the WKE alone ($\ell^2 = c^2/k_p^2$, $(\ell/\xi)^2 \geq 200$)
